Y-tunnus 1615928-6 / Kotipaikka: Kontiolahti

Remote connection to TREX

- TREX VPLS is an alternative method to connect to the TREX exchange.
- FNE-Finland Ltd provides a remote connection to the Unicast Peering VLAN nationwide via FNE MPLS backbone and local operators.
- The connection is implemented using VPLS technology. Traffic between two TREX VPLS members takes the most direct route within FNE backbone and does not enter the TREX switch matrix at all.

FNE-Finland Oy

 Tel. +358 (0) 9 4257 9202 / Fax. +358 (0) 9 276 7163
 Y-tunnus 1615928-6 / Kotipaikka: Kontiolahti

Restrictions for TREX VPLS

- TREX VPLS is not a full TREX membership class. The primary difference is that it is only for access to Unicast Peering (IPv4 & IPv6).
- Each TREX VPLS customer gets one IPv4 address and one IPv6 address for the peering VLAN.
- Traffic is limited on the customer connection to one MAC address (router mac).
