National IPv6 Launch

TREX WORKSHOP 2014

A new IPv6 recommendation

- FICORA published a new recommendation on March 2014 to promote the introduction of IPv6 to consumer broadband subscriptions.

  - [Suositus IPv6:n käyttöönotosta kuluttajalaajakaistaliittymissä (200/2014 S)](#)

- The Recommendation aims to establish good practice and it was prepared by the Finnish IPv6 working group.

- The recommendation is available only in Finnish (sorry for that).

but that's not all...

- FICORA has decided to arrange a national IPv6 launch that will be held in 9/6/2015.

- FICORA invites all broadband and web service providers to participate the event.

- FICORA also invites organizations like TREX to participate the organization of the event and the seminar that will also be held in 9/6/2015.

- More information will be published in Autumn:
  - » www.ipv6nyt.fi, www.ipv6nu.fi and www.ipv6now.fi

What about requirements?

- The requirements for broadband service providers are:
  - » To deploy IPv6 in its consumer broadband connections as a basic feature (native IPv6 or if that's not possible 6rd).
  - » The providers is encouraged to participate the event with all of its networks but if that's not feasible it is possible to participate also with just some (e.g. mobile or FTTH) networks.
- Telecommunications operators must demonstrate their IPv6 readiness with
  - » A product description
  - » IPv6 Forum IPv6 Ready certification
- This information has to be send to FICORA 08.05.2015 at the latest.
