Remote connection to FICIX/TREX

Henri Grönroos – 26/05/2015

Remote peering at FICIX via TREX port

Private service VLAN per FICIX location

Single MAC-address allowed per Virtual P2P service

Freely configurable capacity

nebula

Nebula Cloud Connect via TREX port

Routed(L3VPN) or Bridged direct connectivity to your Nebula Cloud Instances

Private service VLAN per Cloud Connect

Remote peering at TREX from anywhere in Nebula network

Virtual P2P connectivity to Peering LAN at TREX

Single MAC address allowed

All traffic is switched via TREX switch, not directly between remote members

Nebula Cloud Connect, FICIX remote peering

Both services are also available from anywhere in Nebula network
(In most larger economic areas in Finland)

Also versatile offering for other Corporate network options
(L2VPN, VPLS, L3VPN, Oper-DSL, IP-transit)

Thank you
